Structure and Operation of the Board

The Board operates pursuant to a formal Board Charter Policy which sets out matters of corporate governance including the composition, functions and responsibilities of the Board and matters affecting Directors in execution of their duties. The policy recognises that the Board is elected to represent shareholders' interests in the direction and management of the Company and the interests of its employees, customers and the local community where it operates.

The skills, experience and expertise relevant to the position of each Director who is in office at the date of the annual report and their term of office are detailed in the Directors' Report.

A Director is considered to be independent where they are a Non-Executive Director, are not a member of management and are free of any relationship that could, or could reasonably be perceived to, materially interfere with the independent exercise of their judgment. The existence of the following relationships may affect independent status if the Director:

- is a substantial shareholder of Decmil or an officer of, or otherwise associated directly with a substantial shareholder of Decmil (as defined in section 9 of the Corporations Act);
- is employed, or has previously been employed in an executive capacity by the Group, and there has not been a period of at least three years between ceasing such employment and serving on the Board;
- has within the last three years been a principal of a material professional adviser or a material consultant to the Group, or an employee materially associated with the services provided;

Corporate Governance Statement

- is a material supplier or customer of the Group, or an officer of or otherwise associated directly or indirectly with a material supplier or customer;
- has a material contractual relationship with the Group other than as a Director.

Directors are expected to bring independent views and judgement to the Board's deliberations. The Board Charter requires that at least one half of the Directors of Decmil be Non-Executive (preferably independent) Directors and that the Chair will be a Non-Executive Director.

In accordance with the definition of independence above, and the materiality thresholds set, the Board reviewed the positions and associations of each of the 5 Directors in office at the date of this statement and considers that 3 of the Directors are independent as follows:

Name	Position
Don Argent	Non-Executive Director
William Healy	Non-Executive Chairman
David Saxelby	Non-Executive Director

The Board will assess the independence of new Directors upon appointment and will continue to assess the independence of Directors, as appropriate. To facilitate independent judgement in decision-making, Directors must declare immediately to the Board any potential or active conflicts of interest and the Board will determine whether to declare to the market, any loss of independence.

The term in office held by each Director in office at the date of this statement is as follows:

Name	Position
Don Argent	Appointed March 2018
Denis Criddle	Appointed August 2007

Each of these committees has formal charters that outline the committee's roles and responsibilities and the authorities delegated to it by the Board.

Nomination Committee

The Board is of the view that due to the nature and size of the Company's operations, the functions normally performed by a nomination committee can adequately be performed by the full Board. This view is reviewed annually.

The Company maintains a Board skills matrix to assist in identifying the skills, knowledge, experience and capabilities required of the Board to meet the Company's strategic objectives. Risk Management

Decmil recognises the importance of risk management and has a specific policy and procedure in place to standardise its focus and approach to risk management for the Group.

The Board is ultimately responsible for risk management of the Group and must be satisfied that significant risks faced by the Group are being managed appropriately and that the system of risk management within the Group is robust enough to respond to changes in the Group's business environment.

The Audit and Risk Committee assists the Board in relation to oversight of risk management practices and has the following responsibilities for risk management:

- developing an understanding of key risk areas and the consequences of major risk events;
- gaining assurance as to the adequacy of the Group's policies and procedures for integrating risk management into its operations; and
- reviewing the insurance strategy and determining the extent to which it aligns with the risk exposure of the Group.

Each business unit within the Group is responsible for the identification, assessment, control, reporting and monitoring of risks. Business units are responsible for implementing the requirements of the Group's risk management policy and procedures, and for providing assurance to the Board that compliance is being maintained.

Corporate Governance Statement

In summary, the Group Risk Management system comprises:

- a Group Risk Management Policy Statement and Procedure based on the Standard for Risk Management (AS/NZS ISO 31000:2009 Risk Management – Principles and Guidelines). The Policy and Procedure outlines the Group's approach to managing risk including a description of responsibilities;
- an Enterprise Risk Register that identifies the most material risks facing the Group, together with an action plan to mitigate the occurrence or effect of each identified risk. Each of the risks on the Enterprise Risk Register have been allocated an owner who is responsible for monitoring, reporting and implementing action plans. The overall management of the Enterprise Risk Register rests with the Group Risk Controller who meets with risk owners on a quarterly basis to update each relevant risk in terms of occurrence, effect and status of action plans. The Group Risk Controller integrates any findings from ongoing operational audits and compliance work into the Enterprise Risk Register. The Group Risk Controller provides a report to the Audit and Risk Committee on a quarterly basis for each of the risks on the Enterprise Risk Register and the overall management of enterprise risk. The Enterprise Risk Register is reviewed and refreshed on an annual basis as a component of the business planning process. The Enterprise Risk Register brings together the most critical risks (both corporate and operational) identified by the Group Risk Management System and creates a structured process for regular reporting to the Board;
- a Tax Risk Register that identifies potential tax risks facing the Group, including controls and documentation implemented to reduce risk ratings to a tolerable level (medium or below). The Tax Risk Register is owned by the Group Financial Controller and updated annually or in accordance with any adverse findings;
- a Group Risk Controller; Group HSEQ Manager, who is responsible for managing and implementing Decmil's risk management framework;
- a section on Risk Management incorporated within each individual annual business unit plan which are reviewed quarterly. These operational risks are separate to risks identified within the Enterprise Risk Register and are specific to the business plan focus of the particular business unit;
- bid / project (operational) specific risk and opportunity workshops which are completed both pre- and post- contract award, with the outcomes from these workshops maintained in a 'live' project risk register. Bid risk registers are reviewed prior to Client submission and Project risk registers are reviewed during the monthly project review cycle by the business unit General Manager; and
- a Group wide comprehensive insurance program, which is reviewed annually.

The Decmil Internal Control system comprises:

- management's understanding and acceptance of its responsibility to implement appropriate systems of internal control to effectively manage potential risks;
- ongoing oversight of strategic matters by Executive Management and of operational matters by Business Unit Management;
- various policies and procedures covering areas such as Finance, Human Resources, Information Technology, Safety and Delegations of Authority which are centrally located via an intranet;
- monthly reporting and review of financial and budgetary information;
- external auditors independently evaluating the Group's internal control environment and its compliance with International Financial Reporting Standards on an annual basis; and
- internal auditors undertaking specific internal audit work at the direction and following a schedule agreed by the Audit and Risk Committee.

The Group undertakes internal audit reviews using suitably qualified internal auditors. An annual audit schedule for the Group is developed at the commencement of each financial year as a component of the business planning process and is aligned to the Group risk management process and updates to the Enterprise Risk Register. The audit schedule is monitored by the Audit and Risk Committee with outcomes reported during quarterly reviews. As part of the audit of the financial statements, the Company's auditor has undertaken specific internal audit testing on major business cycles to determine the extent to which it can rely on the Company's key internal controls to produce reliable financial and performance information.

Corporate Governance Statement

The Group has exposure to material economic risks including variability of market conditions and legislative changes to the sectors within which it operates. These risks are mitigated by ongoing research and monitoring of changing market conditions and diversification of the Group into a number of complimentary sectors. Mitigation of environmental risks includes maintenance of a certified environmental management system (AS/NZS ISO 14001:2015) and implementation of an environmental management program that aims to ensure sustainable work practices and monitoring and minimising environmental impacts (emissions) as far as practicable. Social sustainability risks, where they arise, are identified and managed within the Group Risk Management system.

The Board has received a written assurance from the Chief Executive Officer and the Chief Financial Officer that, to the best of their knowledge and belief, the declaration provided by them in accordance with section 295A of the Corporations Act is founded on a sound system of risk management and internal control and that the system is operating effectively in relation to financial reporting risks. The Board understands that these assurances for internal control systems provide a reasonable level of assurance only and do not imply a guarantee against adverse events, or losses, or more volatile outcomes arising in the future and that the design and operation of the internal control systems relating to financial reporting has been assessed primarily through the use of declarations by process owners who are responsible for those systems.

Performance of the Board

The performance of the Board and its individual Directors is reviewed on a regular basis, to ensure measurable improvements and overall efficiency.

The Board has determined that either an external or an internal Board review process will be conducted on an annual basis, with external reviews being conducted only when deemed required. The internal review process consists of robust discussions, involving an assessment of the individual performance of each of the Chairman and individual Directors and an assessment of the Board against the Board's objectives and responsibilities as set out in the Board Charter. As an internal Board review was conducted in late 2017, a review was not conducted in 2018.

The process for evaluating the performance of the Remuneration Committee and the Audit and Risk Committee involves an internal review of its performance against its objectives and responsibilities as set out in the relevant committee charter.

The performance of executives is reviewed regularly against appropriate measures. Further, the performance of executives is reviewed internally on an annual basis pursuant to a Companywide performance review process. Key performance indicators are agreed on an individual basis for such executives and performance against these indicators is then reviewed by the Chief Executive Officer. The outcome of the review then provides the basis for a professional development plan for each of the key executives.

Remuneration

It is the Company's objective to provide maximum stakeholder benefit from the retention of a high-quality Board by remunerating Directors fairly and appropriately with reference to relevant market conditions.

The Remuneration Committee must ensure that the remuneration packages of directors and executives:

- display a balance between fixed remuneration and variable remuneration which is tailored to performance objectives;
- provide for a link between the performance of the Company and individual; and
- are consistent with the Company's remuneration policy and any other relevant Company policies.

Corporate Governance Statement

All executives receive a base salary plus superannuation and performance incentives. The fixed component, base salary, is determined based on the position requirements, skills, experience and expectations. The variable component, performance incentives, is linked to specified performance targets. The payment of bonuses, equity based payments such as performance rights and other incentives are reviewed by the Remuneration Committee periodically as part of the review of executive remuneration.

The Remuneration Committee review the executive remuneration packages by reference to Company performance, individual performance and comparable information from industry reports.

The Remuneration Committee is responsible for providing advice to the Board with respect to Non-Executive Directors' remuneration. The remuneration packages of Non-Executive Directors should generally be fee based and the Remuneration Committee must ensure that:

- there is a clear distinction between the structure of Non-Executive Directors' and Executive Directors' remuneration; and
- Non-Executive Directors do not participate in remuneration schemes designed for Executive Directors or receive equity based payments, bonus payments, retirement or termination benefits other than statutory superannuation.

There is no scheme to provide retirement benefits, other than statutory superannuation, for Non-Executive Directors.

The Board expects that the remuneration structure implemented will result in the Company being able to attract and retain the best executives to run the economic entity. The remuneration strategy will also provide executives with the necessary incentives to work towards growing long-term shareholder value.

For a full discussion of Decmil's remuneration philosophy and framework and the remuneration, including all monetary and non-monetary components, received by Directors and specified executives in the current period please refer to the remuneration report, which is contained within the Director's Report.

Code of Conduct

The Company requires its Directors, employees and contractors to observe the highest standards of behaviour and business ethics in respect to its operations. Managers are expected to undertake reasonable steps in ensuring that employees, contractors, consultants, agents and partners are aware of the Company's Code of Conduct policy to foster an environment that encourages ethical behaviour and compliance.

The Code of Conduct imposes high standards of behaviour and business ethics including:

- complying with all relevant laws and acting honestly and with integrity;

- not allowing any person to be disadvantaged in honestly reporting any breach of the Code of Conduct to senior management or any Director.
