This Offers do not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

The SPP Offer is not being extended and Securities will not be issued to investors with a registered address which is outside Australia or New Zealand.

The Placement Options Offer is not being extended and Placement Options will not be issued to investors with a registered address which is outside Australia, New Zealand, Hong Kong or Singapore.

The Warrant Offer is not being extended and Warrants will not be issued to investors with a registered address which is outside Australia.

New Zealand

This offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

This offer and the content of the offer document are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act and the regulations made under that Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority, New

Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

The offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

3. PURPOSE AND EFFECT OF THE OFFERS

3.1 Purpose of the Placement and the Offers

As set out in Section 1.1, the Company is intending to raise up to approximately \$12,000,000 through the Placement and the SPP to support working capital for growth, including enabling the Company to reduce its reliance on the NAB overdraft facility and repay the final outstanding amount due to surety providers for called bonds and pay of facility fees.

SPP Offer

The purpose of the SPP Offer is to raise up to \$2,000,000 (before costs).

The funds raised from the SPP Offer are intended to be applied in accordance with the table set out below:

Proceeds of the SPP Offer	(\$)	%
Repayment of the NAB overdraft	\$1,800,000	90.00%
Working capital	\$123,000	6.15%
Expenses of the SPP Offer ¹	\$77,000	3.85%
Total	\$2,000,000	100.0%

Notes:

1. Refer to Section 6.7 for further details relating to the estimated expenses of the Offers.

If the Company raises less than \$2,000,000 under the SPP Offer, the amounts allocated to payment of the expenses of the Offers, the repayment of the NAB overdraft and working capital will proportionately reduce.

The above table is a statement of current intentions as of the date of this Prospectus. As with any budget, intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

4.2 Terms and conditions of Warrants

4.2.1 Definitions

For the purposes of this Section 4.2:

Adjusted Price means the price calculated in accordance with the following formula:

$$\frac{A + B}{C}$$

where:

A = market capitalisation of the Company on the trading day prior to the announcement of the issue of equity securities;

B = the number of equity securities the subject of the issue multiplied by their issue price; and

C =

- (a) the number of Shares on issue immediately after the issue of equity securities; plus
- (b) if the issued equity securities include convertible securities, the Diluted Amount of those convertible securities.

If a Share is issued pursuant to the exercise of an Option, its issue price for the purposes of parameter B above will be the exercise price of the Option.

Diluted Amount means:

- (a) in relation to an issue of Shares, the number of issued Shares; and
- (b) in relation to an issue of convertible securities:
 - (i) the maximum number of Shares that may be issued from the conversion of those convertible securities into Shares; or
 - (ii) if the maximum number of Shares cannot be determined until the time of conversion, the maximum number of Shares that would be issued if the convertible securities were converted on the date of issue of the convertible securities (but otherwise in accordance with the terms of the convertible securities).

Exercise Price means the lower of the following per Warrant Share:

- (a) \$0.65; and
- (b) if the Company makes an issue of equity securities (or a series of consecutive issuances of equity securities in any period not exceeding 12 months) and the Diluted Amount of those equity securities (in aggregate) exceeds 15% of the number of Shares on issue before the issue or issuances:
 - (i) the Adjusted Price; or

- (ii) in the case of a series of issuances, the volume weighted Adjusted Price in relation to those issuances,

or as otherwise adjusted in accordance with Section 4.2.3 below.

Paragraph (b) does not apply to an issuance of equity securities that concludes before the date of utilisation of the loan facility (the **Utilisation Date**) (or any issuance of equity securities announced before the Utilisation Date that is subject to Shareholder approval), but does apply to all issuances of equity securities after that date and may apply on more than one occasion and in respect of any set of consecutive issuances (in which case the applicable value for the purposes of paragraph (b) will be the lowest value determined in accordance with paragraph (b) on any of those occasions). For the purposes of paragraph (b), two or more issuances of equity securities will occur within a period not exceeding 12 months if they are both announced in a period not exceeding 12 months.

4.2.2 General Terms

(b) Expiry Date

Each Warrant will expire at 5:00pm (WST) on the date that is 60 months after the date of the Meeting (**Expiry Date**).

If a Warrant is not exercised on or before the Expiry Date (**Exercise Period**), then the Warrant and all rights of holder in connection with the Warrant lapse and cease to be of any force or effect from the end of the Exercise Period.

(c) Exercise of Warrant

The holder may exercise the Warrant by delivering a duly executed notice of exercise to the Company at any time during the Exercise Period.

The holder may exercise the Warrant in respect of:

and the Warrant shall remain in effect in respect of any Warrant Shares which have not been the subject of a Notice of Exercise (defined below).

(d) **Purchase Price**

Subject to Section 4.2.3 below, the amount payable upon exercise of the Warrant will be equal to the number of Warrant Shares proposed to be issued multiplied by the Exercise Price (**Purchase Price**).

(e) **Completion**

If the holder delivers an Exercise Notice to the Company, completion of exercise of the Warrant (**Completion**) will take place on:

- (i) if on the date of delivery of the Exercise Notice (**Exercise Date**) the Company is not in possession of excluded information (as defined in section 708A(7) of the Corporations Act) (**Excluded Information**), the date that is five Business Days after the Exercise Date; or

- (iv) the holder must pay, or procure that its nominee pays, to the Company the Purchase Price.

(f) **Post-Completion Obligations**

Immediately and in any event within five Business Days after Completion, the Company must:

- (i) give ASX a notice that complies with section 708A(5) of the Corporations Act; or
- (ii) lodge a prospectus in accordance with section 708A(11) of the Corporations Act,

so that the on-sale of those Warrant Shares are not subject to any on-sale or other restrictions, limitations or additional requirements on their transferability and tradability and are freely transferable on the ASX.

(g) **Dividends**

The Warrant does not confer on the holder any entitlement to any dividends or other distributions by the Company or any right to attend or vote at any general meeting of the Company.

In a winding up or liquidation of the Company, the Warrant ranks equally with all other Shares.

(h) Quotation

The Warrant shall not be listed for quotation on ASX or any other securities exchange.

4.2.3 Bonus Issues, Pro-Rata Issues and Reorganisations of Capital

(a) Participation in new issues of Shares

- (i) The holder cannot participate in a new issue of capital offered to Shareholders during the Exercise Period without first exercising the Warrant.
- (ii) Notwithstanding Section 4.2.3(a)(i), the Company must give written notice to the holder at least 15 Business Days before the record date applicable to any new issue of capital offered to Shareholders in order to give the holder the opportunity to exercise the Warrant and receive the Warrant Shares prior to the date of determination of entitlements to participate in the new issue.

(b) Bonus Issues

If the Company makes (whether before or during the Exercise Period) a bonus issue to Shareholders, then the number of Shares over which the Warrant is exercisable is increased by the number of Shares which the holder would have received under the bonus issue if the holder had exercised the Warrant prior to the record date for the bonus issue and no change will be made to the Exercise Price.

(c) Pro Rata Issues

If the Company makes (whether before or during the Exercise Period) a pro-rata issue of Shares (except a bonus issue) to Shareholders which does not result in paragraph (b) of the definition of Exercise Price being engaged, the Exercise Price of the Warrant is adjusted in accordance with the formula set out in ASX Listing Rule 6.22.2 (but only if such adjustment would result in a reduction to the Exercise Price).

(d) Reorganisation of capital

If there is a reorganisation of capital of the Company (whether before or during the Exercise Period) then the rights of the holder are changed to the extent necessary to comply with the ASX Listing Rules applying to a reorganisation of capital at the time of the reorganisation.

(e) Non-Ordinary Shares

- (i) The Company must not issue any shares in the capital of the Company other than fully paid ordinary shares (including preference shares, performance shares and partly paid shares) (**Non-Ordinary Shares**) (or securities convertible into Non-Ordinary Shares) without the consent of the holder.
- (ii) The holder agrees to provide its consent under Section 4.2.3(e)(i) if the Exercise Price is adjusted so that the economic value of the Warrant is not adversely affected by the issue described in clause Section 4.2.3(e)(i).

4.3 Rights and liabilities attaching to Shares

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain,

be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

5. RISK FACTORS

5.1 Introduction

The Directors strongly recommend that applicants for Securities under this Prospectus consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

(a) Potential for dilution

Upon implementation of the Offers, assuming all Securities offered under this Prospectus are issued and exercised, the number of Shares in the Company will increase from 148,048,236 Shares currently on issue to 153,048,236 Shares. If the issue of the Shares under the Tranche 2 Placement is approved by Shareholders, and these Shares are issued, the number of Shares on issue will subsequently increase to 158,737,597. This means that immediately after the Offers and the Tranche 2 Placement each Share will represent a significantly lower proportion of the ownership of the Company.

Further if the Placement Options, the SPP Options and the Warrants are subsequently exercised, each Share will represent a significantly lower proportion of the ownership of the Company.

It is not possible to predict what the value of the Company, a Share will be following the completion of the Offers and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.37 on 5 August 2021 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offers.

(b) **Potential funding issues**

The Company's ability to effectively implement its business strategy over time, may also depend in part on its ability to raise sufficient working capital. The Company's capital requirements depend on numerous factors. There can be no assurance that any such equity or debt funding will be available to the Company on favourable terms or at all. If adequate funds are not available on acceptable terms, the Company may not be able to take advantage of opportunities or otherwise respond to competitive pressures.

The Company relies on surety bond providers or its primary bank to provide bonding facilities that allow the Company to procure new work. As the Company grows its revenue, it may need to find new bonding facilities which may not be available to the Company on acceptable terms. If such bonding is not available on acceptable terms, the Company may not be able to take advantage of growth opportunities.

(c) **Current disputes**

The Company is a party to a dispute regarding its Sunraysia Solar Farm contract. This dispute may be resolved on a commercial basis and/or through formal dispute proceedings. The timing and the outcome of this dispute is uncertain and may result in the Company not receiving amounts which it has forecast or making payments which it has not forecast. This may result in significant financial loss to the Company or lower than anticipated project realisation. The Company has signed a Moratorium with the Client, agreeing a stay of Arbitration proceedings as well as an agreement not to draw down on Security Bonds to offset potential liquidated damages – this Moratorium runs through to anticipated Substantial Completion of the works, which is nominated as 30/11/2021. The Arbitration proceedings against Schneider (downstream) remain on foot.

In addition, Southern Cross Engineering and Electrical (**SCEE**) is in formal arbitration proceedings with Decmil relating to SCEE's subcontract on the 2017 Rio Tinto Amrun Project. While Decmil considers that SCEE is unlikely to be successful in this arbitration, there remains a chance that SCEE may be successful in which case the Company may have to make a payment to SCEE. This may result in a material financial loss to the Company.

(d) **Debt facilities**

The Company has agreed debt and bonding facilities with both National Australia Bank, Pure Asset, Horleys and its four main surety bond providers.

If the Company is unable to repay or refinance its debt facilities upon the expiry of these facilities, the Company may have to seek further equity funding, dispose of its assets, or enter into new debt facilities on less favourable terms and there is no guarantee it will be able to do so. These factors could materially affect the Company's ability to operate its business and its financial performance.

The Company is also subject to various covenants and obligations contained in its debt facilities. In the event that any of these are breached, the Company's lenders may cancel their commitments under the facilities and require all amounts payable to them under or in connection with the facilities to be repaid immediately. If the Company

is unable to repay or refinance its debt facilities upon maturity, or in the event of a breach of covenant, the Company may have to seek further equity funding, dispose of its assets, or enter into new debt facilities on less favourable terms and there is no guarantee it will be able to obtain further debt. These factors would materially affect the Company's ability to continue to operate its business and its financial performance

(e) **Future capital requirements**

While the Company believes that it will have sufficient working capital on completion of the Offers and the Placement and through its ability to draw down under the Debt Facilities, there remains a risk that the Company may need additional capital in the future. For example, the Company is required to make assumptions when carrying out its forecasting activities and these may prove incorrect, including revenue forecasts or the outcome of disputes. While the Company has taken a conservative view in making these assumptions, it may transpire that the Company's anticipated working capital shortfall is greater than forecast and that the capital raised through the Placement and the SPP, and the capital available under the Debt Facilities is insufficient to bridge this working capital shortfall.

Any additional equity financing that the Company may undertake in the future may dilute existing Shareholders. The terms of any additional debt financing, if available, may impose further restrictions on the Company's financing and operating activities. The Company's ability to raise further capital (equity or debt) within an acceptable time, of a sufficient amount and on terms acceptable to the Company, will vary according to a number of factors, including stock market and industry conditions. There can be no assurance that the Company will be able to obtain capital when required in the future, or that the terms and the time in which any such financing can be obtained will be acceptable to the Company. This may have an adverse effect on the Company's financial position and prospects.

(f) **Accreditations**

The Company relies heavily upon various technical and financial accreditations to operate its business. These include safety accreditations, quality assurance standards, building licences, technical accreditations by State Main Roads agencies and various financial accreditations. Many of these accreditations are assessed and monitored by State and Federal government agencies on a regular basis. Any failure to maintain or comply with an accreditation can impact the eligibility of the Company to participate in certain projects and/or sectors and this will have a material effect on the business.

(g) **Effective management of contracts and the risk of dispute**

Effective ongoing contract management seeks to ensure, among other things, appropriate project and customer selection and the effective management of customer expectations and contract terms. There is a risk that the Company may fail to manage its existing contracts appropriately and may therefore be subject to disputes with customers regarding the payment of fees and liability for costs and delays. Such disputes can be costly, result in further liability to the Company, absorb significant amounts of management time and damage customer relationships. The Company may also experience payment defaults or

delays, whether in conjunction with disputes or otherwise, leading to increased debt levels.

(h) **External factors that may impede operational activities**

The Company's activities are subject to numerous operational risks, many of which are beyond the Company's control. The Company's activities may be curtailed, delayed or cancelled as a result of factors such as adverse weather conditions, mechanical difficulties, shortages or increases in the costs of consumables, spare parts, plant and equipment, external services failure, industrial disputes and action, IT system failures, mechanical failures and compliance with governmental requirements. Industrial and environmental accidents could lead to substantial claims against the Company for injury or loss of life, and damage or destruction to property, as well as regulatory investigations, penalties and the suspension of operations. The occurrence of any one or a combination of these events may have a material adverse effect on the Company's performance and the value of its assets.

(i) **Safety**

In order for the Company to continue working on engineering construction projects, a robust safety methodology needs to be in place. A serious safety incident or fatality may impact the Company's social licence to operate. This can affect the Company by increasing its costs for carrying out work, increasing the time required to complete packages of work and impairing the Company's ability to win new work.

(j) **Labour costs and availability**

The Company's ability to remain productive and competitive and to effect its planned growth initiatives depends on its ability to attract and retain skilled labour.

Tightening of the labour market in key regions due to a shortage of skilled labour, combined with a high industry turnover rate and growing number of competing employers for skilled labour, may inhibit the Company's ability to hire and retain employees. The Company is exposed to increased labour costs in markets where the demand for labour is strong. A shortage of skilled labour could limit the Company's ability to grow its business or lead to a decline in productivity and an increase in training costs and adversely affect its safety record. Each of these factors could materially adversely impact its revenue and, if costs increase or productivity declines, its operating margins.

(k) **Tender processes and new contracts**

The Company's revenue is dependent on winning new contracts with acceptable terms and conditions. The Company operates in increasingly competitive markets and it is difficult to predict whether and when the Company will be awarded new contracts due to multiple factors influencing how clients evaluate potential service providers, such as accreditations, maintenance and safety standards, experience, reputation, client relationships and financial strength. Consequently, the Company is subject to the risk of losing new awards to competitors which will adversely impact its business, results of operations and financial condition. The Company's results of operations and cash flows may fluctuate from quarter to quarter depending on the timing and size of

new contract awards. The Company is also at risk from materially underestimating the cost of providing services, equipment or plant.

(l) **Homeground occupancy**

Any abatement in economic activity in the Gladstone region will result in a short-term diminution in the occupancy levels at the Homeground Village and lower levels of revenue and profit than historically generated. The Company expects that in the medium-term new opportunities will arise for Homeground Gladstone as energy prices rise and energy companies (gas, hydrogen, renewables) progress investment plans; however, the risk of volatility in the short term remains present.

(m) **Labour Supply**

The Company's ability to remain productive, profitable and competitive and to effect its planned growth initiatives, depends on its ability to attract and retain skilled labour. Tightening of the labour market in key regions due to a shortage of skilled labour, combined with a high industry turnover rate and growing number of competing employers for skilled labour, may inhibit the Company's ability to hire and retain employees. The Company is exposed to increased labour costs in markets where the demand for labour is strong. A shortage of skilled labour could limit the Company's ability to grow its business or lead to a decline in productivity and an increase in training costs and adversely affect its safety record. Each of these factors could materially adversely impact its revenue and, if costs increase or productivity declines, its operating margins.

(n) **Environmental Regulation**

The Company is subject to environmental regulation in accordance with applicable state, territory or federal legislation and statutory requirements for the jurisdictions in which it operates. The Company aims to continually improve its environmental performance.

(o) **Inflation**

The buoyant economy and demand for construction services and commodities is impacting the price of many construction components including steel, concrete and other items. While most of the Company's contracts contain rise and fall clauses, those clauses generally reference publicly available cost indices which may not correspond to the price rises of cost inputs and as such the profitability of individual projects may be impacted.

(p) **General Meeting**

The issue of Shares under the Tranche 2 Placement is subject to Shareholder approval being obtained at the General Meeting. If Shareholder approval is not obtained, the Company will be in default under the subordinated debt facility agreement, and the Lenders may declare all or any part of the subordinated debt facility to be immediately due and payable. In these circumstances, the Company would be unable to immediately repay the debt facility and may be required to seek alternative arrangements with the Lenders.

The issue of the Warrants is subject to Shareholder approval being obtained at the General Meeting. If Shareholder approval is not

obtained, the Company will not be able to issue the Warrants to the Lenders and will be required to pay to the Lenders the full economic value of the Warrants. The economic value is to be determined by an independent expert with suitable qualifications should the Lenders and the Company fail to agree the amount. The current economic value of the Warrants is estimated to be approximately \$1,174,000 (based on a Black-Scholes valuation using a Share price of \$0.37). However, the Company notes that the economic value of the Warrants is likely to fluctuate over time.

(q) **Climate Risk**

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

(r) **Coronavirus (COVID-19)**

The outbreak of the coronavirus disease (**COVID-19**) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

In addition, the Company's Australian projects may be impacted by international supply issues and the inability for the Company's workforce to move between states. The delivery of key supplies and construction components have all been either delayed or cancelled as a result of restricted international trade in light of COVID-19. As a result of sudden and unpredictable border travel changes, freight of interstate supply items may be impacted which in turn may cause delays in the delivery of projects.

The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its revenue channels and any adverse impact on the Company. If any of these impacts appear material prior to close of the Offers, the Company will notify investors under a supplementary prospectus.

5.3 General risks

(a) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's, as well as on its ability to fund those activities.

The Company is exposed to the impact of economic cycles and, in particular, how these cycles increase or decrease future capital expenditure by State and Federal governments and by energy and resources companies. These economic cycles are in turn impacted by a number of factors including: the fiscal conditions of the economy; government policies on capital expenditure; and commodity prices.

(b) Lump sum contracts

A portion of the Company's contracts are 'lump sum' in nature and to the extent costs exceed the contracted price, there is a risk these amounts may not be recovered. From time-to-time, variations to the planned scope occur or issues arise during the construction phase of a project, not anticipated at the time of bid. This may give rise to claims under the contract with the principal in the ordinary course of business. Where such claims are not resolved in the ordinary course of business, they may enter formal dispute and the outcome upon resolution of these claims may be materially different to the position taken by Company.

(c) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future

performance of the Company or any return on an investment in the Company.

In addition, the extent of the effects of COVID-19 is at this stage uncertain and continuing to evolve. The COVID-19 pandemic is having, and is expected to continue to have, a significant influence on the volatility of equity markets generally and may continue to impact and influence the value of the Company's quoted securities.

(d) **Litigation risks**

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.

(e) **Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(f) **Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

(g) **Reliance on key personnel**

The Company's ability to remain productive, profitable and competitive and to effect its planned growth initiatives, depends on its ability to attract and retain skilled labour. Tightening of the labour market in key regions due to a shortage of skilled labour, combined with a high industry turnover rate and growing number of competing employers for skilled labour, may inhibit the Company's ability to hire and retain employees.

The Company is exposed to increased labour costs in markets where the demand for labour is strong. A shortage of skilled labour could limit the Company's ability to grow its business or lead to a decline in productivity and an increase in training costs and adversely affect its safety record.

Each of these factors could materially adversely impact its revenue and, if costs increase or productivity declines, its operating margins.

5.4 Investment Risk

The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities.

There is no guarantee that the Securities offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Securities.

Before deciding whether to subscribe for Securities under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.

Remuneration

The remuneration of an executive Director is decided by the Board, without the affected executive Director participating in that decision-making process. The total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director. The current amount has been set at an amount not to exceed \$650,000 per annum.

A Director may be paid fees or other amounts (i.e., non-cash performance incentives such as Options, subject to any necessary Shareholder approval) as the other Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director. In addition, Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in or about the performance of their duties as Directors.

The following table shows the total annual remuneration paid to both executive and non-executive Directors as disclosed in the Company's 2020 Annual Report and the unaudited period from 1 July 2020 to 30 June 2021. The table also sets out the current remuneration structure for Directors.
