## DECMIL CONCLUDES DISPUTE WITH SCHNEIDER ELECTRIC AND IS WELL POSITIONED TO SECURE TWO NEW CONTRACT AWARDS IN WESTERN AUSTRALIA

- **Dispute with Schneider (Sunraysia downstream dispute) settled**
- **Decmil advised of conditional preferred contractor for civil Balance of Plant works on the 108 MW Waddi Wadi Wind Farm in Western Australia**
- **Decmil enters Early Contractor Involvement (ECI) for rail maintenance facility expansion with Roy Hill**

### Schneider Dispute settled

Decmil Group Limited is pleased to announce that it has reached an agreement with Schneider Electric Australia Pty Ltd to conclude their dispute in relation to the Supply Contract at the Sunraysia Solar Farm project in New South Wales.

The terms of the settlement are confidential, but Decmil can confirm there will be no material impact on its financial accounts.

As announced to the market on 12 August 2021, the resolution of the Schneider dispute is an enabler for Decmil to progress its arbitration dispute with the Sunraysia Solar Project trust for the Head Contract at the Sunraysia Solar Farm project.

### Waddi Wind Farm

Decmil, working together with RJE Global, has been advised of conditional preferred status as Balance of Plant contractor for the construction of the 108 MW Waddi Wind Farm in Western Australia. The project is located approximately 15 km north-west of the township of Dandaragan and approximately 150 km north of Perth in the mid-west region of the wheatbelt, in close proximity to where Decmil successfully delivered the Yandin and Warradarge Wind Farms completed in 2020. An early works scope of works will be agreed to support the development phase of the project which is targeted to commence construction in late 2023.

Decmil was awarded the circa \$79 million Yandin Balance of Plant contract for the 214 MW Yandin Wind Farm in April 2019 and the \$72 million Warradarge Balance of Plant contract for the 180MW Warradarge Wind Farm in March 2019.

### Roy Hill Rail Yard Expansion ECI

Decmil has been awarded an Early Contractor Involvement contract by Roy Hill Infrastructure to provide Early Design Development Services for its Rolling Stock Maintenance Workshop upgrade.

The scope of works under the contract includes upgrades and expansions to the following facilities that were previously designed and constructed by Decmil as part of a \$57 million rail terminal buildings package (see ASX announcement dated 11 April 2013) to support the increase of the Roy Hill Mine

# ASX Announcement

capacity. The latest contract includes extensions to the rolling stock maintenance workshop, locomotive washdown facility and warehouse buildings. The revenue to be derived by Decmil will be dependant on the final scope of works.

Decmil CEO Rod Heale stated:

“We have made substantially positive strides in both resolving legacy issues and pivoting our business to grow with high-quality contracts.”

“The Schneider settlement marks another significant step in Decmil methodically resolving its legacy issues, following on from the SCEE dispute resolution in August, which gives us greater business certainty to deliver on our strong order book.

“We have the significant potential to expand our order book further via the Waddi Wind Farm and Roy Hill Rail Yard Expansion contracts, which sit right within our geographical expertise and core operational capabilities.”

*This ASX release was authorised by the Decmil Group Limited Board.*

## About Decmil:

Decmil Group Limited (DGL) offers a diversified range of services to the Australian resources and infrastructure industries. Companies within the group specialise in engineering and construction; accommodation services; and maintenance. Listed on the Australian Securities Exchange (ASX Code: DCG), Decmil's goal is to maximise returns from our operations to deliver value to our shareholders, clients and other stakeholders.
